- Weatherproof cushions
- QuickDry system
- Easy to clean

Cushions with QuickDry system – for extra comfort

1. Cane-line fabric

Cane-line's cushion fabrics are woven from solid-dyed, weather-resistant and UV-resistant synthetic fibres that can withstand all kinds of weather.

2. Inner cover

The cushion's inner cover is water-repellent and made of nylon, which means that around 90% of rainwater is repelled.

3. Padding

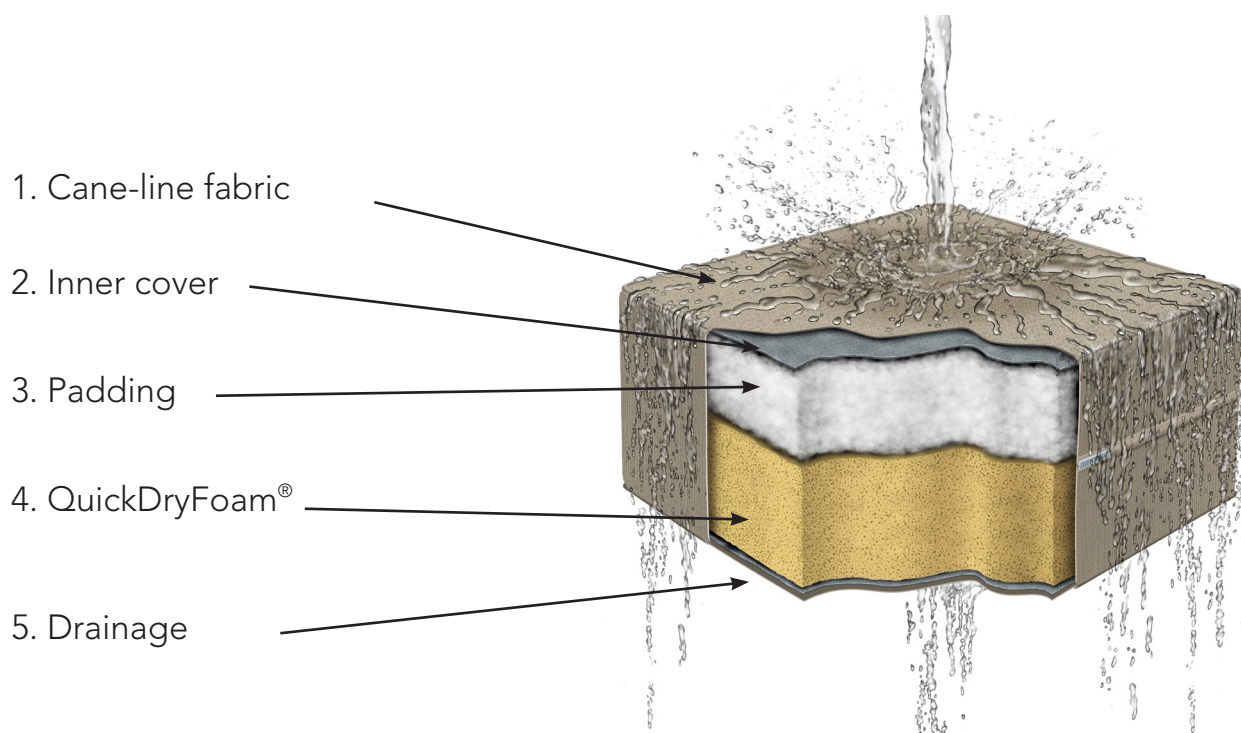

The padding is made of thermoplastic fibre for a soft, comfortable sit.

Cane-line®

4. QuickDryFoam®

The core of the cushion consists of QuickDryFoam®. The structure of the foam ensures that the small amount of water that does penetrate the cushion runs through quickly. The cushion has a built in memory feature, so the foam remembers its original shape. Treated with an antibacterial agent, they can be left outside all year round.

5. Drainage

A built-in net drain efficiently wicks water through the cushion. The drain ensures an air supply to the cushion, providing ventilation and helping the cushion to dry. In the back cushion, the drain is located at the bottom and at the back, and in the seat cushion it is in the side. If the seat cushion is exposed to rain and dew, simply place it upright to allow the water and moisture to disappear. The back cushion drains automatically. Soon after it has rained, the cushion is dry again, allowing you to use the furniture again.
