SAUM & VIEBAHN

Spring 2021

Contents

- Collection description

- Sales package – April/ Apple

It has been a year of challenges we could never have imagined, with many a difficult obstacle to overcome, and we will probably be dealing with the consequences of this crisis for a long time to come. But every cloud has a silver lining.

During the past year, our home has become more important than ever before. Our familiar retreat has become an oasis of safety, so we want to make it as comfortable and homely as possible. And what better way to do that than with beautiful textiles from Saum & Viebahn? We are starting the new year in a positive frame of mind and full of anticipation about presenting the new Spring Collection 2021!
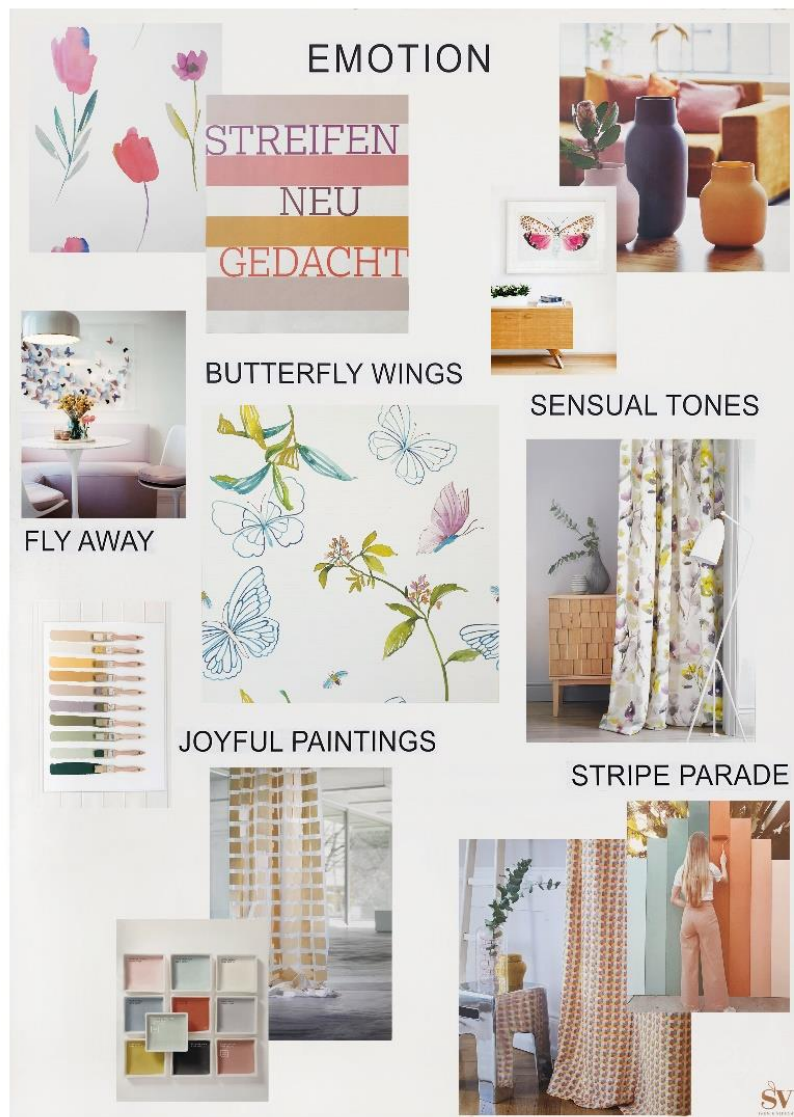

The sun comes after the rain! The **EMOTION** theme world invites us to immerse ourselves in a bright and happy world. Pastel shades are replaced by lively colours such as apricot, lilac, yellow and aqua shades to breathe fresh air into our home. The design ranges from finely coordinated watercolour flowers to subtle graphics that blend skilfully into a room without dominating it.

Colourful/ Happyness

The two curtains **Colourful** and **Happyness** live up to their name. The filigree butterflies on the two devoré products promise pure joie de vivre. In Colourful, the butterflies fly through a sky of watercolour flowers to bring colour to your windows. The colours of Happyness, by contrast, are more understated and radiate peace and harmony in pure white.

The theme world **COUNTRY** conveys the pure feeling of naturalness and well-being, coupled with subtle use of shape and colour. The result is an atmospheric ensemble of natural materials, classic-modern designs, exciting surfaces and homely shades. A broad spectrum of non-colours is enhanced with delicate pastel shades that run through the theme world and its fabrics.

Yves

The shadow play of leaves on the jacquard **Yves** recalls a woodland walk and brings nature into our four walls. The three-dimensional effect makes the double width decorative fabric stand out, but it also fits harmoniously into every room thanks to its muted colours.

ELEGANCE – motifs and designs become clearer. The graphic moves into the foreground and radiates with timeless elegance. Metallic shades become more contemporary than ever before and an exciting interplay of colour and shape is created on textures that alternate between lustrous and matt. A unique theme world that puts the focus on living.

Dolce

Elegance meets the art of weaving. Scherli **Dolce** makes your windows a unique eye-catching feature and delights with its clear design. The shiny circle elements in modern metallic shades are spread over the elegant matt base fabric and create an exciting interplay of shape and colour.

Shell

The fine net **Shell** is a truly talented all-rounder. Its subtly shiny surface gives the plain an elegant yet modern appearance. Its "inner" qualities are captivating too: for example, the Shell net curtain is flame-retardant and double width and, with 16 elegant shades, it is a pretty problem solver.

Luke

Like is not only a great, softly flowing, flame-retardant plain with a harmonious colour scheme, but above all a technological highlight. The double width decorative fabric with "anti-microbial technology" features a safe, highly developed anti-bacterial protection system for textile surfaces. Tested surface treatment with **HeiQ VIROBLOCK by CHT** is used for the protection system. It involves progressive silver technology and vesicle reinforcer technology. This technology is effective against viruses and bacteria on textile surfaces. What's even more important today is that this technology has also been tested to be effective against the SARS COV 2 virus. Use of this system enables antimicrobial properties to be transferred to Luke and therefore to keep the surface of the textile free from viruses and bacteria – within just a few minutes. HeiQ V-Block protects the textile from the growth and effect of micro-organisms, as well as their breakdown..

HeiQ V-Block won the coveted Swiss Technology Award 2020.

RECYCLE

Jade/ Lapis/ Teak/ Achat

Along with all of the important factors that make a great fabric, such as look, feel and function, the focus is increasingly shifting to environmental awareness. We think more and more about how we can contribute to a more "sustainable" world.

Saum & Viebahn have been thinking about this too, and about how all of these factors and functions could be combined.

The result is a set of four plains in different thicknesses with a softly flowing feel, naturally fresh colours and exciting textures. However, what makes **Jade**, **Lapis**, **Teak** and **Achat** special is that they are not only suitable for private and commercial use, but also have a high recycled polyester content. These four all-rounders not only bring exciting textures to windows, but also do their bit for a sustainable future. A wonderful combination for creating a sense of cosiness and well-being in your own home, with a clear conscience.

Furthermore, manufacturing recycled polyester uses 2/3 less energy and 90% less water than conventional polyester, but with the same durability and longevity. With these environmentally friendly and resource-efficient products, we can therefore ensure that less plastic ends up in the environment.

Recyceltes Polyester verbraucht bei der Herstellung weniger Energie und weniger Wasser als konventionelles Polyester. Recyceltes Polyester hat die gleiche Haltbarkeit und Langlebigkeit wie herkömmliches Polyester, ist jedoch wesentlich umweltfreundlicher. Durch das Recyceln des Kunststoffs können wir dafür sorgen, dass weniger Plastik in die Natur gelangt.
